

DonorForce

Description

Donor Force was developed by Netwise Multimedia to help churches, ministries and NGO's to compete with commercial entities in gaining interest and receiving funds online. Donor Force is a complete online relational donor management system like nothing else out there.

Not only can you manage your donor member information, you can receive online financial gifts, for projects and campaigns; and observe donor giving patterns and history too.

Features

- Add projects to the front end of the website for potential donors to read about and give to.
- Projects can be listed in groups or categories under more than one menu item for better presentation.
- Donation plugin can be placed directly into articles making it easy to tailor your website to your needs.
- Each project has a display that can be altered to meet your needs. There is a progress bar, funds raised notification, funding goal, project image, project description and Snapscan / Zapper option for easy giving.
- Registration and sign up of donors in the front end for easy donor management.
- Option to use a full registration or a short easygift form for making donations

online.

- Automated sending of thank you letters and Section 18A (or standard) receipts by e-mail for donations added via the website and the administrative back end.
- Donors can look up their donation history on the website via login
- Donations can be once off special gifts, recurring debit orders, recurring Credit card transactions or bequest notifications.
- Gifts in Kind (eg. cars, computers, food etc). can be listed and thank you emails generated and sent automatically.
- Incorrectly allocated gifts can be re-allocated to a different donor or project.
- Gifts can be split between more than one project.
- Backend administrator login with Donor records.
- Donors can be added, edited, removed, publish and unpublished as required.
- Donor history is recorded and totalled in the back end.
- Donors can be classified into new contacts, and level 1, level 2, and level 3 donors.
- Notes can be added to each donor record to record interactions with donors.
- Donors can be added to a membership ie: a member of your church.
- Donors can be targeted through email campaigns using Donor Force's integration with ACY Mailing.
- Debit orders and recurring payments can be added and managed in the back end. Customisation for specific banking requirements possible.
- Debit orders run by your bank can be imported.
- Donors can be marked active or non-active in their giving.
- Debit order runs can be exported for use with most major South African banks.
- Electronic statements from all major banks can be processed. Gifts unallocated are placed in a pending state until donor and project can be identified.
- Processed statement can be exported for importing into accounting packages.
- Reports on giving can be extracted - Project giving, donor giving, donor last gift - filter by date range.
- Paygate, Payfast and Netcash are used to process online transactions. Other payment gateways can be used. We can develop a plugin for your payment system.

Test Drive

Why not test drive it for yourself. Go and select a project and make a "special gift" donation. Your credit card not be needed for the transaction. Please use the following information when asked to submit your credit card info:

Name: Piet Pompies

Credit Card Number: 4000000000000002

Expiry Date: 01/2015

CVV: 111

Then Click on the Backend menu item for images of the back end management system.
